Because of the variety of grades within schools it is impossible to categorize all schools in Mississippi as Elementary or Secondary. For 1988-89 school year schools will be categorized as:

Elementary (K-8)
Combined Elementary and Secondary (K-12)
Secondary (7-12)
Special Education
Vocational-Technical Education

SCHOOL ACCREDITATION
1988-89

The Education Reform Act of 1982 created a performance-based accreditation system and made state accreditation a mandatory process for all public school districts. The performance-based system emphasizes outcome measures rather than quantitative factors and is designed to accredit school districts rather than individual schools. During school year 1988-89, the Commission on School Accreditation awarded an accredited status to each of the 155 public school districts. Two Agricultural High Schools and fifteen school districts were placed on probation for substandard performance on outcome measures. Twenty-nine districts were warned for less than adequate performance on these measures. The state accreditation system remained voluntary for nonpublic and special schools in the state. The majority of the nonpublic schools are parochial, and the special schools are those established to serve special needs of students. During the 1988-89 school year, the Commission on School Accreditation received applications from and subsequently accredited 56 nonpublic schools and 21 special schools.

[1] Data covers 187,100 full and part-time production workers in manufacturing who worked during or received pay for the payroll period including the 12th of the month. The average earnings are "Gross", that is, they reflect not only change in basic hourly and incentive wage rates, but also such factors as premium pay for overtime work and shift differentials. The workweek information relates to average hours worked or paid for and is somewhat different from scheduled hours because of such factors as absenteeism, labor turnover, part-time work, overtime work and stoppages. These series are prepared by the Mississippi Employment Security Commission in cooperation with the Bureau of Labor Statistics of the United States Department of Labor.

[1] Vehicles of the civilian branches of the Federal Government are given in this table. Vehicles of the military services are not included.

[2] This information, compiled chiefly from reports of state authorities, is incomplete in many cases. Some states give state-owned vehicles only; others exclude from registration certain classes, such as fire apparatus, and police vehicles. For the states not reporting state, county, and municipal vehicles separately from private and commercial vehicles and those reporting unsegregated totals only, classification by vehicle type has been approximated on the basis of other available data.

The number of courts reporting to the Department of Public Welfare affects the total children's cases and consequently the comparability from year to year of youth court statistics. Courts from only four counties (Bolivar, Hinds, Pike, and Warren) have reported one or more cases for each year from 1950 through 1972. The size of the courts not reporting also influences the total cases.

Because of many limitations the trend table does not show the extent of delinquency or neglect in this state and may be particularly misleading if only total number of cases is used to make comparisons between years.

[1] States can report three estimates of prison capacity; rated, operational, and design. Some states report fewer estimates or the same number for all estimates. Excludes persons housed in local jails.

[2] Jurisdiction counts exclude prisoners held in jails because of crowding.

[3] Numbers are custodial, not jurisdictional counts.

[1] Timberland is forest land that is producing or is capable of producing crops of industrial wood and not withdrawn from timber utilization by statute or administrative regulation. Areas qualifying as timberland have the capability of producing in excess of 20 cubic feet per acre per year of industrial wood in natural stands. Currently inaccessible and inoperable areas are included.

[2] Includes Indian lands.

[3] Sawtimber is timber suitable for sawing into lumber. Live trees of commercial species containing at least one 12-foot sawlog or two noncontiguous 8-foot logs, and meeting regional specifications for freedom from defect. Softwood trees must be at least 9.0 inches diameter, and hardwood trees must be at least 11.0 diameter at 4½ feet above ground. International 1/4-inch rule.

[4] Live trees of commercial species meeting specified standards of quality or vigor. Cull trees are excluded. Includes only trees 5.0 inches diameter or larger at 4½ feet above ground.
